

Infinite Talent BrassRing Platform Common Service Vendors

Last Updated: April 2024

The information contained in this document is the property of Infinite Computer Solutions. Except as specifically authorized in writing by Infinite Computer Solutions, the holder of this document shall: (1) keep all information contained herein confidential and shall protect same in whole or in part from disclosure and dissemination to all third parties and, (2) use same for operating and maintenance purposes only.

The Infinite BrassRing Platform offers common service integrations with several vendors for employment screening, assessments, video interviewing, etc. Choosing to implement these integrations can save your users valuable time and reduce possible data entry errors. They can also speed up recruitment workflows by seamlessly sending data to and from external vendors throughout the hiring process.

Vendors listed below use our common services integration platform to integrate with BrassRing. It is your organization's responsibility to contact and contract with any vendor you would like to integrate with. Please note that if the vendor you are considering contracting with is not on this list, it is still possible to integrate through one of our other options: (1) mapping tool integration (2) open APIs (3) custom integration. Please reach out to your Infinite contact for more information.

If you are in contact with a vendor that would like to be added to our common services integration platform, please have them reach out to your Infinite representative for more information.

Types of Common Service Integrations

- [Employment Screening / Background Checks](#)
- [Assessments](#)
- [Job Board Posting Aggregators](#)
- [Video Interviewing](#)
- [Work Opportunity Tax Credit \(WOTC\)](#)
- [SMS Texting](#)
- [Calendar Scheduling for Interview Manager](#)
- [Social Media Networks](#)
- [Contact Relationship Management \(CRM\)](#)
- [Common Service Integrations in Onboard](#)

Employment Screening / Background Check Vendors

The Background Check common service platform integrations to various 3rd party vendors providing background check, drug and reference checking services through a common integration point.

One-Step vs Two-Step Integrations

One-Step:

- System users can trigger a pre-selected Background Check, Drug Screen or Video Interview by updating a candidate's HR Status.
- All necessary information is sent to the vendor and a real time response will be received by the user verifying Success or Failure.
- If Successful, no further action is required. The vendor will process the request and send back results when available.
- If Unsuccessful, the user will need to undo the HR Status on the candidate and update the necessary form/field with the missing or invalid information (or may not be a valid user with the vendor). Then the candidate can be updated to the HR Status again.
- RAMs can also be utilized to initiate 1-step integrations by updating the candidate to the applicable HR Status.
- This integration type saves time when all of the details for the integration have already been collected within BrassRing.

Two-Step:

- Upon updating the HR status for a candidate, the Vendor user interface (UI) is shown and the system user will complete any additional information (such as package or account) before submitting the request.
- RAMs cannot be utilized to initiated 2-step integrations.
- This integration type is useful when necessary details are not known in advance or are not collected within BrassRing.

Basic status and results are stored in a BrassRing candidate results form. Detailed results can be viewed by clicking on the results link in the form which launches the user into the BGC vendor's site.
